APPENDIX B EASA REQUIREMENTS

The EASA requirements that are not harmonized with the FAA requirements are identified in this appendix. CRI A-08 will be raised to establish the “Validation Items” based on CFR / CS differences in Airworthiness Codes, in interpretations of the Code and in the Means of Compliance. These differences and compliances will be addressed as follows:

Regulatory Requirement	Description	Amendment level	Document	Title	MOC	Method of Compliance	AR Approve / Recommend	Test Witnessing (AR / OMT)	AR Discipline	Estimated Approval Date	Applicability											
											Model - 2	Model - 3	Model - 1									
Means of Compliance: 0 = Compliance Statement; 1 = Design Review; 2 = Calculation / Analysis; 3 = Safety Assessment; 4 = Lab Test; 5 = Ground Test; 6 = Flight Test; 7 = Inspection; 8 = Simulation; 9 = Equipment Qualification; SI = Similarity; ELOS = Equivalent Level of Safety Finding, PExempt = Petition for Exemption, N/A = Not Applicable AR Discipline: ST = Structural; LF = Loads and Flutter; PP = Powerplant; ME = Mechanical Systems; EL = Electrical Systems; FA = Flight Analyst; TP = Flight Test Pilot; AC = Acoustical																						
CS 25.1703(e) Function and Installation; EWIS 25/5 N/A N/A N/A The GVII-2 is the original type design, so this requirement regarding modifications to the original type design is not applicable.																						
CS 25.1703(e) Function and Installation; EWIS 25/5 N/A N/A N/A The GVII-1 and GVII-3 are modifications to the original type design (GVII-2) and any EWIS modifications will be designed and installed to the same standard as the original type design.																						
CS 25.1705(b)(4) Systems and Functions; EWIS 25/5 71P5797001N001 HARNESS INSTL - IRM, WING, LH 1 Design review of the drawings will confirm that the components of EWIS associated with the Fuel tank are considered an integral part of that system in showing compliance.																						
CS 25.1705(b)(4) Systems and Functions; EWIS 25/5 72P5797001N001 HARNESS INSTL - IRM, WING, LH 1 Design review of the drawings will confirm that the components of EWIS associated with the Fuel tank are considered an integral part of that system in showing compliance.																						
CS 25.1705(b)(4) Systems and Functions; EWIS 25/5 72P5797002N001 HARNESS INSTL - IRM, WING, RH 1 Design review of the drawings will confirm that the components of EWIS associated with the Fuel tank are considered an integral part of that system in showing compliance.																						
CS 25.1705(b)(4) Systems and Functions; EWIS 25/5 73P5797001N001 HARNESS INSTL - IRM, WING, LH 1 Design review of the drawings will confirm that the components of EWIS associated with the Fuel tank are considered an integral part of that system in showing compliance.																						
CS 25.1705(b)(4) Systems and Functions; EWIS 25/5 73P5797002N001 HARNESS INSTL - IRM, WING, RH 1 Design review of the drawings will confirm that the components of EWIS associated with the Fuel tank are considered an integral part of that system in showing compliance.																						
CS 25.1705(b)(4) Systems and Functions; EWIS 25/5 73P9731001N001 HARNESS INSTL - IRM, LH, CTR-MID 1 Design review of the drawings will confirm that the components of EWIS associated with the Fuel tank are considered an integral part of that system in showing compliance.																						
CS 25.1705(b)(4) Systems and Functions; EWIS 25/5 73P5797736N001 HARNESS INSTL - SPAR, WINGBOX SIGNAL, RH, FWD 1 Design review of the drawings will confirm that the components of EWIS associated with the Fuel tank are considered an integral part of that system in showing compliance.																						
CS 25.1705(b)(4) Systems and Functions; EWIS 25/5 73P5797738L HARNESS ASSY - WINGBOX SIGNAL, MIDBOARD, RH 1 Design review of the drawings will confirm that the components of EWIS associated with the Fuel tank are considered an integral part of that system in showing compliance.																						
CS 25.1705(b)(4) Systems and Functions; EWIS 25/5 73P5797742L HARNESS ASSY - WINGBOX POWER, EBHA, RH 1 Design review of the drawings will confirm that the components of EWIS associated with the Fuel tank are considered an integral part of that system in showing compliance.																						
CS 25.1705(b)(4) Systems and Functions; EWIS 25/5 73P5797746L HARNESS ASSY - WINGBOX POWER, MCE, RH 1 Design review of the drawings will confirm that the components of EWIS associated with the Fuel tank are considered an integral part of that system in showing compliance.

APPENDIX C CONFORMITY PLAN

PART I FAA CONFORMITY PLAN		DATE: See cover page date	Revision: (B)
a. Applicant name: Gulfstream Aerospace Corporation	b. Project number: TC-01-2010-0024 (GVII-G500), AT-01-2010-0025 (GVII-G600), AT-01-2010-0026 (GVII-G400)		
c. Aircraft model(s) to be modified:	GVII-G500, GVII-G600, GVII-G400		
d. General Description of project: The Gulfstream model GVII is defined as a new product family of three airplanes of similar design and manufacture, but with different gross weights / physical dimensions and different range capabilities. The family, referred to as GVII-G400, GVII-G500, and GVII-G600, will replace the current production GIV-X and GV-SP airplanes. The GVII-G500 will function as the baseline and the -3 and -1 will be variants of that model. The GVII-G500 aircraft contains numerous aircraft systems including hydraulic systems, environmental control systems, landing gear systems, avionics systems, etc. Many of these systems receive control data and feedback monitoring data to the different system line replaceable unit's (LRU's) installed in various parts of the aircraft. Power for aircraft systems is created by integrated drive generators (IDG) on each engine. EWIS carries power to the forward cabin. Power is then distributed by two power distribution boxes (PDB's) located directly beneath the forward left and right equipment racks. The GVII-G500 aircraft will contain an electronically controlled flight control system, with active control side sticks in the cockpit, sending movement commands via the flight control computer (FCC) to electrically activated components of the flight control system mounted on the trailing edge of the wings, rudder, and trailing edges of the horizontal stabilizer. EWIS is the backbone of the power distribution and control/monitoring system. EWIS provides interconnection between electrically activated and monitored components on the aircraft. Data, power, and control/monitoring data can be passed between components in the system via EWIS.			

PART II Name of Focal points for project:																																																																																
a. Facility Quality Assurance:	Tommy Robinson – Quality Assurance, Gulfstream Aerospace (912) 965-5513 Tim Hayes – Sr Manager, Procurement, Quality Assurance, Gulfstream Aerospace (912) 395-0171																																																																															
b. Facility Test & Evaluation:	Phil Burton – Flight Test, Gulfstream Aerospace (912) 965-7563 Craig Buckthal – Engineering, Gulfstream Aerospace (912) 965-4058																																																																															
c. Facility Engineering:	Stephen Shaw – Cognizant Lead Engineer, Gulfstream Aerospace (912) 965-2964 Craig Buckthal – Cognizant Engineer, Gulfstream Aerospace (912) 965-4058

PART III General Information					
a. Is an FAA Approved Repair Station doing the modification and has it been evaluated?	YES	NO	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
b. List the location(s) where the modification and installation will be done and who will do the work: The airplane will be produced by the manufacturer Gulfstream Aerospace Corporation – 500 Gulfstream Road, Savannah, GA 31407 USA					
c. Describe the maintenance requirements needed for maintaining the aircraft during the project: The aircraft used during flight testing will be experimental aircraft. These aircraft will be maintained by a released draft of the maintenance manual, see GVII-GER-0073, GVII Project Specific Certification Plan for additional details. Records of modifications are kept by the quality inspector, the maintenance team leader, and the Flight Test department.					
d. Aircraft Information	Is Aircraft U.S. Registered?	YES	NO	<input checked="" type="checkbox"/>	<input type="checkbox"/>
	List Aircraft Registration Number: GVII-G500 test article aircraft: T1 (N500GA), T2 (N502GS), T3 (N503G), T4 (N504GS), P1 (TBD), or P2 (TBD) Registration number - TBD GVII-G600 test article aircraft: T1, T2, T3, or P1 – Registration Number TBD Registration number - TBD GVII-G400 test article aircraft: T1, T2, T3, or P1 - TBD Registration number - TBD				
	TC/STC Notification letter for Foreign Registered Aircraft and Validation/Acceptance of In-process TC/STC N/A	Date Letter Sent N/A	Reply Received N/A		

Part IV Inspections systems

- a. Describe the type of planning, travelers, work orders, etc. used for inspection. If procedures are used list the procedure title and latest revision/date:**

Flight Test Work Authorization (FTWA) Process (Flight Test environment)

Manufacturing Engineering Planning and Quality Assurance Travelers (Production environment)

- b. Are suppliers going to be used for the project?**

EWIS components are supplied by Gulfstream Aerospace Corporation

YES

**NO
X**

- c. If so, name the supplier(s), location and their involvement in the project:**

- d. Is the supplier(s) quality system approved by applicant?**

YES

**NO
N/A**

- e. Are the supplier(s) special processes approved for this project?**

YES

**NO
N/A**

- f. If the suppliers are not approved for the special processes explain the process of how will they be approved to perform the process:**

Not applicable

Part V Applicant Conformity Inspections

- a. List company inspection procedures to be used to perform Conformity Inspection / First Article inspection:**

Conformity inspections are completed in accordance with the Gulfstream ODA Manual, GOP0004 – Request for Conformity (RFC) Issuance and Gulfstream Production Quality Assurance Manual (QAP) Section QI 7.1.2 – FAA Conformity – First Article Inspection

- b. Are these procedures equivalent to the conformity inspection criteria in FAA Order 8110.4 Chapter 5?**

**YES
X**

NO

- c. If not, what alternative procedures will be used to ensure the same level of inspections are made?**

N/A

- d. Name of the responsible QA person(s) from the applicant responsible to sign the 8130-9 Statement of conformity in accordance with 14 CFR §21.50 and §21.33:**

Gulfstream Quality Management (or their Agent via supplier delegation letter – TBD).

Part VI FAA Conformity Inspections Identification and Tracking

- a. Name of AR(s) responsible to generate the 8120-10 request for conformity for this project.**

The engineering AR(s) listed in Section II(e) will identify their conformity requirements to the following for issuance of the 8120-10:

Robert Glasscock, Initial Phase ODA Program Administrator (912) 965-6817

Tom Strohmayer, ODA RFC Coordinator, (912) 395-7778

Glen Williams, ODA RFC Coordinator (retired)

- b. Explain how the 8120-10s will be coordinated with the ARs.**

8120-10 will be coordinated per ODA Manual, Section 15.1.1.3.2.2.2

- c. Explain how the applicant will track the initiation and completion of Conformity Inspections:**

8120-10 will be coordinated per ODA Manual, Section 15.1.1.3.2.2.2

- d. Name of person (s) responsible to track the conformity inspections for the applicant:**

Robert Glasscock, Initial Phase ODA Program Administrator – Gulfstream Aerospace (912) 965-6817

Part VII Conformity Description

a. Part conformity	Description of parts and assemblies to be conformed:		
	NOTE: Part quantities listed support GVII-G500 conformity requirements

c. Test conformity	Description of test equipment/ instrumentation being used that will require installation conformity:	
	There is no test equipment or instrumentation conformity associated with EWIS.	

d. Flammability and Fire-blocking Test coupon conformity	Description of coupons and test instrumentation requiring conformity: N/A																																																																																																								
	Description of Tests requiring test set up conformity: N/A																																																																																																								
e. Post Conformity Modifications and/or Replacements	Description of how modifications or replacement of FAA conformed parts will be re-conformed: The components will be returned to the appropriate supplier (see part IV (c) for suppliers list) to be re-conformed or will be re-conformed at Gulfstream Aerospace per ODA Manual Section 15.1.1.3.2.2.2.8																																																																																																								
	Person responsible for tracking modifications or replacements: James Glotzbach – Quality Assurance, Gulfstream Aerospace (912) 965-4445 Nicholas Altomare – Flight Test, Gulfstream Aerospace (912) 965-4270																																																																																																								
f. Flight Testing	Location(s) of TIA flight tests: Flight testing is not applicable to the certification of EWIS.																																																																																																								
	Estimated date of flight testing: Flight testing is not applicable to the certification of EWIS.																																																																																																								
g. Part VIII Airworthiness Certification and Return to Service at Completion of Program

a. Who will make application (Form 8130-6) to FAA and where will the certification take place? Ref AC 21-12	Experimental certificate: Gulfstream Aerospace Corporation – 500 Gulfstream Road, Savannah, GA 31407 USA
	Standard airworthiness certificate: Gulfstream Aerospace Corporation – 500 Gulfstream Road, Savannah, GA 31407 USA
b. If required describe the plan to incorporate all approved design changes to the test aircraft in order to make the aircraft eligible for a Standard Airworthiness Certificate: See GVII-GER-0073, GVII Project Specific Certification Plan	

c. Name and location of company(s) applying for PMA after issuance of TC/STC (if applicable):

See GVII-GER-0073, GVII Project Specific Certification Plan

This Conformity Inspection Plan describes the actions regarding the repair, modification and type design activities necessary to ensure all required Conformity Inspections and related activities are accomplished in support of the project. The plan establishes guidelines and policies for identification and tracking of ODA required Conformity Inspections performed at the applicant's facility and its approved suppliers.

The Conformity Inspection Plan will be reviewed and accepted by the ODA Program Administrator prior to its attachment to the Certification Plan and its implementation. Conformity Inspections will be identified, coordinated and tracked for completion by the applicant in accordance with procedures described above.

Changes to plan: Revision control for changes to this plan. Implementation of this plan will be to established procedures. Unforeseen circumstances may require those procedures to be revised or new procedures written.

ADDENDUM 1 MODEL GVII-G600

1.0 PURPOSE

Any information that is currently known about deviations from the baseline (GVII-G500 model) for the GVII-G600 model is addressed within this addendum, in the same format as the rest of the document. If no changes are to be made from the baseline, then the section containing that amendment is maintained.

2.0 APPLICABLE DOCUMENTS

The following subsections identify documents referenced herein that are applicable to the GVII-600 Certification. These documents replace documents referenced in the GVII-G500 Certification Plan. See Appendix A and Appendix B for a list of documents demonstrating compliance.

2.1 Engineering Reports

Document Number	Document Title
GVII-GER-0848	GVII-3 MLG ASSEMBLY INSTRUCTIONS
GVII-GER-0849	GVII-3 NLG ASSEMBLY INSTRUCTIONS
GVII-GER-2447	System Review Report, GVII-3 Electrical Wiring Interconnect System

2.2 Test Plans and Requirements

Document Number	Document Title
GAC-CR-02612	Qualification Test Procedure Touchdown Endurance Test Electrical Harness LH/RH GVII-G600 Main Landing Gear (73P3212471Z/73P3212472Z)

2.3 Drawing Documentation

2.3.1 Wire Harness Assembly Looms

Drawing Number	Drawing Title
73P9702012L	HARNESS ASSY - RADOME, TRIAX ASSY

change from GVII-G500 Certification Plan.

2.6 Operational Support Documents

There is no operational support document associated with this certification plan.

2.7 FAA Documents

No change from GVII-G500 Certification Plan.

2.8 EASA Documents

No change from GVII-G500 Certification Plan.

2.9 Related Certification Plans

No change from GVII-G500 Certification Plan.

2.10 Abbreviations and Acronyms

No change from GVII-G500 Certification Plan.

3.0 DESCRIPTION

EWIS for the GVII-G600 will be based on the GVII-G500. The same parts and components will be used to make the EWIS. Changes will be made to accommodate changes in airframe size and differences in systems.

3.1 General EWIS Overview

No change from GVII-G500 Certification Plan.

3.2 EWIS System Description

No change from GVII-G500 Certification Plan.

4.0 REGULATORY REQUIREMENTS

No change from GVII-G500 Certification Plan, except as prescribed by a later certification basis evaluation under 14 CFR Part 21, §21.101, and / or subsequent configuration review assessments.

The EASA Certification Basis for the GVII-G600 will be CS 25 amendment 25/13 (effective June 10, 2013) and CS AWO (effective October 17, 2003)..

5.0 COMPLIANCE

5.1 Limitations

No change from GVII-G500 Certification Plan.

5.2 FAA Issue Papers / EASA Certification Review Items

No change from GVII-G500 Certification Plan, except for items which may be determined as required by later certification basis evaluation under 14 CFR Part 21, §21.101, and / or subsequent configuration review assessments as defined in GVII IP G-1 for GVII-G600 if any modifications of airborne software are considered "significant".

TABLE 9: GVII-G600 APPLICABLE IPS AND/OR CRIS

Identifier	Title	Type of IP/CRI
FAA Issue Paper		
GVII IP G-1	GVII-G600 Establishment of Type Certification Basis	Certification Basis
EASA Certification Review Items		
GVII CRI A-01	GVII-G600 EASA Type Certification Basis	Means of Compliance
GVII CRI A-08	GVII-G600 Validation Items and Significant Regulatory Differences	Means of Compliance

5.3 Equipment Qualification

Compliance shown for the GVII-G500 will be applicable to the GVII-G600, except for GVII-G600 unique EWIS components documented in GER-0662 Addendum 1.

5.4 Software / Hardware Design Integrity Level

Compliance shown for the GVII-G500 will be applicable to the GVII-G600.

5.5 Hazard Assessment

Compliance shown for the GVII-G500 will be applicable to the GVII-G600.

5.6 System Safety Analysis

Compliance shown for the GVII-G500 will be applicable to the GVII-G600.

5.7 Test Articles

No change from GVII-G500 Certification Plan.

5.8 Human Factors Considerations

No change from GVII-G500 Certification Plan.

5.9 GVII IP S-08 Issue Paper Considerations

No change from GVII-G500 Certification Plan.

5.10 EWIS System Definition and Requirements General

No change from GVII-G500 Certification Plan.

6.0 CONFORMITY

No change from the GVII-G500 Certification Plan.

6.1 Conformity for Component and Assembly Level Testing

All component and assembly level testing conducted for the GVII-G500 is applicable to the GVII-G600, no additional testing is required.

6.2 Conformity for Ground Test Articles (S73, F73)

The GVII-G600 electrical harnesses are a derivative of the GVII-G500 EWIS design and are considered substantially similar; therefore, any level one installation that carries the same part number as the GVII-G500 equivalent (i.e. 73P123456L7 is substantially similar to 72P1234567L) will not be conformed. Applicable new components will carry a unique 73P part number and will be conformed accordingly.

6.3 Conformity for Flight Test Articles (73001 - 73004)

No change in conformity philosophy from GVII-G500. If any carryover components installed in the test aircraft are manufactured under the GVII-G500 production certificate, conformity may be waived at the discretion of the Engineering AR responsible for the test if all MRB activity associated with the component is available and traceable to the test article.

7.0 SCHEDULE

7.1 Significant Milestones

| **Table 10** below provides an anticipated schedule for certification of the EWIS system on the GVII-G600 aircraft:

TABLE 10 SIGNIFICANT MILESTONES

Milestones	Completion Dates
System Summary Compliance Report Complete and Submitted	4Q 2018
Final Type Board Meeting	4Q 2018

8.0 ODA UNIT MEMBERS / PROJECT PERSONNEL

8.1 Project Personnel

No change from GVII-G500 Certification Plan.

8.2 Delegation Limitations and Stipulations

No change from GVII-G500 Certification Plan.

9.0 CONTINUED AIRWORTHINESS INFORMATION

No change from GVII-G500 Certification Plan.

ADDENDUM 2 MODEL GVII-G400

1.0 PURPOSE

Any information that is currently known about deviations from the baseline (GVII-G500 model) for the GVII-G400 model is addressed within this addendum in the same format as the rest of the document. If no changes are to be made from the baseline, then the section containing that amendment is maintained.

2.0 APPLICABLE DOCUMENTS

The following subsections identify documents referenced herein that are applicable to the GVII-G400 Certification. These documents replace documents referenced in the GVII-G500 Certification Plan. See Appendix A and Appendix B for a list of documents demonstrating compliance.

2.1 Engineering Reports

Document Number	Document Title
GVII-GER-0883	GVII-1 MLG ASSEMBLY INSTRUCTIONS
GVII-GER-0884	GVII-1 NLG ASSEMBLY INSTRUCTIONS
GVII-GER-2448	System Review Report, GVII-1 Electrical Wiring Interconnect System
GVII-GER-2892	Gulfstream GVII-G400 Changed Product Rule Assessment per 14 CFR 21.101

2.2 Test Plans and Requirements

No change from GVII-G500 Certification Plan.

2.6 Operational Support Documents

There is no operational support document associated with this certification plan.

2.7 FAA Documents

No change from GVII-G500 Certification Plan.

2.8 EASA Documents

No change from GVII-G500 Certification Plan.

2.9 Related Certification Plans

No change from GVII-G500 Certification Plan.

2.10 Abbreviations and Acronyms

No change from GVII-G500 Certification Plan.

3.0 DESCRIPTION

EWIS for the GVII-G400 will be based on the GVII-G500. Same parts and components will be used to make the EWIS. Changes will be made to accommodate changes in airframe size and differences in systems.

3.1 General EWIS Overview

No change from GVII-G500 Certification Plan.

3.2 EWIS System Description

No change from GVII-G500 Certification Plan.

4.0 REGULATORY REQUIREMENTS

The GVII-G400 will seek an Amended Type Certificate based on the GVII-G500, with certification basis as identified in the main body of this document. The proposed FAA Certification Basis for the significant changes, and areas affected by the GVII-G400 design change, will be formalized in a pending future reapplication planned for 3Q2017. Pursuant to 14 CFR 21.101, the applicable regulatory requirements for significant design changes and affected areas is proposed to be 14 CFR Part 25, effective February 1, 1965, including Amendments 25-1 through 25-143, with Special Conditions (SC), Equivalent Safety Finding (ESF) / Equivalent Level of Safety (ELOS), and Exemptions that are considered to be applicable to the Electrical Wiring Interconnect System listed in Table 11.

The proposed EASA Certification Basis for the significant changes and affected areas of the GVII-G400 is CS 25 Amendment 25/18, effective June 18, 2016 and CS AWO effective October 17, 2003, and will be defined in EASA CRI A-01, EASA Type Certification Basis.

GVII-GER-2892, Gulfstream GVII-G400 Changed Product Rule Assessment per 14 CFR 21.101, will document significant and non-significant design changes and affected areas, and any proposed exceptions to these regulatory requirements.

TABLE 11 : SC, ESF/ELOS, AND EXEMPTIONS

14 CFR Part 25 Paragraph	Description	SC, ESF/ELOS, or Exemption
25.1301(a)(4)	Function and Installation	Equivalent Level of Safety (See GVII IP S-01)
25.1309	Equipment, Systems, and Installations	ELOS (See GVII IP S-01)

5.0 COMPLIANCE

5.1 Limitations

No change from GVII-G500 Certification Plan.

5.2 FAA Issue Papers / EASA Certification Review Items

No change from GVII-G500 Certification Plan except for items which may be determined as required by later certification basis evaluation under 14 CFR Part 21, §21.101, and / or subsequent configuration review assessments as defined in GVII IP G-1 for GVII-G400 if any modifications of airborne software are considered “significant”.

TABLE 12: GVII-G400 APPLICABLE IPS AND/OR CRIS

Identifier	Title	Type of IP/CRI
FAA Issue Papers		
GVII IP G-1	GVII-G400 Establishment of Type Certification Basis	Certification Basis
EASA Certification Review Items		
GVII CRI A-01	GVII-G400 EASA Type Certification Basis	Means of Compliance
GVII CRI A-08	GVII-G400 Validation Items and Significant Regulatory Differences	Means of Compliance

5.3 Equipment Qualification

Compliance shown for the GVII-G500 will be applicable to the GVII-G400, except for GVII-G400 unique EWIS components documented in GER-0662 Addendum 2.

5.4 Software / Hardware Design Integrity Level

Compliance shown for the GVII-G500 will be applicable to the GVII-G400.

5.5 Hazard Assessment

Compliance shown for the GVII-G500 will be applicable to the GVII-G400.

5.6 System Safety Analysis

Compliance shown for the GVII-G500 will be applicable to the GVII-G400.

5.7 Test Articles

No change from GVII-G500 Certification Plan.

5.8 Human Factors Considerations

No change from GVII-G500 Certification Plan.

5.9 GVII IP S-08 Issue Paper Considerations

No change from GVII-G500 Certification Plan.

5.10 EWIS System Definition and Requirements General

No change from GVII-G500 Certification Plan.

6.0 CONFORMITY

No change from GVII-G500 Certification Plan.

No change from the GVII-G500 Certification Plan.

6.1 Conformity for Component and Assembly Level Testing

All component and assembly level testing conducted for the GVII-G500 is applicable to the GVII-G400, no additional testing is required.

6.2 Conformity for Ground Test Articles (S71, F71)

The GVII-G400 electrical harnesses are a derivative of the GVII-G500 EWIS design and are considered substantially similar; therefore, any level one installation that carries the same part number as the GVII-G500 equivalent (i.e. 71P123456L7 is substantially similar to 72P1234567L)

will not be conformed. Applicable new components will carry a unique 71P part number and will be conformed accordingly.

6.3 Conformity for Flight Test Articles (71001 - 71004)

No change in conformity philosophy from GVII-G500. If any carryover components installed in the test aircraft are manufactured under the GVII-G500 production certificate, conformity may be waived at the discretion of the Engineering AR responsible for the test if all MRB activity associated with the component is available and traceable to the test article.

7.0 SCHEDULE

7.1 Significant Milestones

| **Table 13** below provides an anticipated schedule for certification of the EWIS system on the GVII-G400 aircraft:

TABLE 13 SIGNIFICANT MILESTONES

Milestones	Completion Dates
System Summary Compliance Report Complete and Submitted	4Q 2022
Final Type Board Meeting	4Q 2022

8.0 ODA UNIT MEMBERS / PROJECT PERSONNEL

8.1 Project Personnel

No change from GVII-G500 Certification Plan.

8.2 Delegation Limitations and Stipulations

No change from GVII-G500 Certification Plan.

9.0 CONTINUED AIRWORTHINESS INFORMATION

No change from GVII-G500 Certification Plan.
